KA2 VET Strategic Partnership :
“Teaching In the Digital Age”

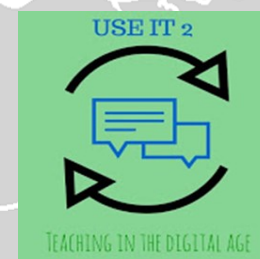

Project No: 2015-1-CZ01-KA202-013878

Project Vision:

In compliance with the vision of 21 century education

- Learning
- Anywhere
- Anytime
- Through any device
- With the support of anyone.

Project Web Page :
<https://useit2blog.wordpress.com/>

Project Mission:

Increase the quality of VET education by motivating to use modern methods of teaching with the strong support of digital media.

Initiate continuous professional development for teachers by introducing new pedagogical methods essential for teaching in the digital age.

Enable teachers by helping them sharing experience and good practices.

Encourage all partner schools to integrate IT in teaching/learning.

Project Goals:

Acquire practical knowledge with the use of cooperative learning and flipped classroom

Develop the use of digital tools in teaching (smart boards, tablets, etc.)

Get to know how to create teaching materials (podcasts)

Put into practice all experiences

Share ideas for using ICT in teaching

Share examples of best practice

Increase language competences

Increase intercultural and cross curricular cooperation.

Target Groups:

Teachers will increase their knowledge about new options for using information and communication technologies (ICT) and of the implementation new methodological approach in education.

They will acquire competences to use new teaching methods and digital tools such as flipped classroom, cooperative learning and digital media (smart boards etc.).

They will improve international teamwork and broaden their personal horizons.

They will establish new relations that can lead to further foreign cooperation.

Thus, the teachers will have higher motivation for further learning.

Partner Schools will increase quality of teaching/learning vocational subjects by implementing innovative methods and practices in VET.

They will introduce students more practical knowledge about possible future employers and jobs.

Finally, partner schools will increase their prestige, open themselves to more intensive international cooperation.

Project Activities:

Transnational Learning/teaching/training activities/workshops focused on job shadowing

Sharing information about using flipped classroom and cooperative learning, digital media (smart boards, tablets, smartphones etc.)

Know-how to create e-learning materials (e.g. podcasts)

3 Transnational meeting for coordinators: 18 mobilities

5 International Learning/Teaching/Training Activities

125 hours of EU training opportunity for 75 teachers from 6 countries/schools

6 Local teacher training events

18 Local pedagogic conferences on Teaching in Digital Age

Project Results:

18 Podcasts for Math and Science subjects

3 Newsletters (in 7 languages)

1 Position Paper on Digital Use in VET

1 Project Leaflet (in 7 languages)

1 Project website and 1 Facebook group
